Good morning, Sarah. Will you please let me know where things stand with the planned site visit, and any access issues? The site visit by BNSF's technical team is critical to its determination of the scope of the proposed Time Critical Removal Action, which scope is necessary for further internal BNSF discussions and deliberations. I understand Randy has been traveling in connection with the Gold King Mine matter, so if the site visit depends on Randy's presence and involvement, maybe you can just give me a sense of timing of the planned site visit.

Thanks Sarah. If this is something we need to discuss, please feel free to call me any time on my cell (415-378-8512).

Best regards,

John
